

## **CYduct Diagnostics Inc. Clinical Team Wins Grant and Takes the Stage at the Dr. Susan Love Foundation's 11<sup>th</sup> International Symposium on the Human Breast**

WESTPORT, CT / ACCESSWIRE / February 22, 2023 / CYduct Diagnostics, Inc. (OTCPK:CYDX) ("CYduct" or the "Company"), is a company focused on developing life-enhancing breast healthcare products, recently attended the 11<sup>th</sup> International Symposium on the Human Breast hosted by Dr. Susan Love Foundation for Breast Cancer Research, a highly-regarded event dedicated to advancing the field of breast health. Where its clinical team won a prestigious grant award for their work within breast cancer risk assessment.

The grant, generously awarded by the Sharon D. Lund Foundation, will allow CYduct's clinicians, in collaboration with leading breast cancer advocacy groups, to continue their work in developing what the company believes will be a revolutionary proteomic breast cancer risk assessment test. This test will utilize targeted biomarkers associated with the progression of breast cancer.

During the symposium, CYduct's clinical team of, Jill Dietz MD, MBA, Paul van Diest MD, PhD. and Chris Sutton PhD., presented their latest findings and progress towards realizing the vision of providing women with a simple, non-invasive way to assess their breast cancer risk in the comfort of their home. The presentation received reassuring feedback and generated significant interest from attendees, including healthcare providers, researchers, and more importantly breast cancer advocates.

Dr. Jill Dietz credits the overwhelming support from the breast cancer advocates for their enthusiastic support for the ability to empower women to take control of their breast health. "The energy and enthusiasm shown by these women, will be the foundation from which we successfully complete our mission and bring breast health management into the hands of all women" she stated.

CYduct Diagnostics' CEO, Dom Gatto, expressed his excitement about the progress and recognition that the group has received, saying, "We are thrilled to have the team win this grant and to have had the opportunity to present their work at the Dr. Susan Love Foundation's 11th International Symposium on the Human Breast. Our goal is to make a difference in the lives of women everywhere by providing them with the tools they need to take control of their breast health. The recognition and support we have received from the advocate community are a testament to the potential of our technology and the impact it can have."

About Dr. Susan Love Foundation for Breast Cancer Research:

**[Dr. Susan Love Foundation for Breast Cancer Research](#)** challenges the status quo to end breast cancer and improve the lives of people impacted by it now through education and advocacy. In 2020, the Foundation was recognized by both Charity Navigator and *Medical News Today* as the #1 breast cancer research organization in the U.S. These honors measure both stewardship of resources and subsequent impact. Through our signature program, **[Love Research Army](#)**, we thoughtfully engage over 350,000 supporters by providing them with ongoing, real-time access to an array of breast cancer studies aimed at finding cause and ultimately ending breast cancer. The Foundation drives collaborative, cutting-edge research with nontraditional partners, brings to light the collateral damage of treatment and seeks ways to diminish it, and interprets science to empower patients. Fast, flexible, and project-based, the Foundation actively engages the public in scientific research to ensure that it produces accurate and meaningful results.
